

MEDIA RELEASE

AWK Group continues to grow - 100 new employees to be hired!

Zurich, April, 29 2020: the consulting firm AWK Group generated CHF 72.49 million in 2019. This corresponds to an increase in turnover of over 23% compared with the previous year. At the same time, the company has also grown strongly in terms of personnel in the past year. The AWK Group is looking for 100 new employees for the current year.

AWK once again significantly increased its turnover last year and, at over CHF 70 million, achieved an increase of over 23% compared with 2018. This means that the company has now managed to exceed the turnover of the previous year for 13 years in succession and continue to grow successfully.

In the past financial year, the management and IT consulting company hired 90 new employees. At the end of 2019, AWK employed 330 people at four locations in Switzerland.

As part of the next growth steps, the company plans to further expand its leading position in the five core competencies Digital Strategy & Innovation, IT-Advisory, Project Management & Transformation as well as Data Science and Cyber Security & Privacy.

AWK is therefore aiming for further organic growth in 2020 and is confident of achieving this despite Corona. The consulting firm is looking for 100 new employees in the current year in order to increase the number of expert practices in all areas.

Since attractive employers also need increasingly creative strategies and approaches in order to distinguish themselves positively from other companies and convince suitable candidates of their merits, AWK is launching "The new 100" competition as an accompanying recruitment measure. AWK is targeting both graduates of Swiss universities in the fields of computer science, business information technology, electrical engineering or physics and young professionals who have already gained initial professional experience.

Interested applicants can take part in the challenge "Enable your Video Performance" via a short video and win attractive prizes. More about the conditions of participation can be found here: www.thenew100.ch.

"From our position of strength, we are again pursuing ambitious growth targets in 2020 and are gearing our employer branding to attract the best specialists with original measures," explains Oliver Vaterlaus, CEO of the AWK Group. "As a 'Great Place to Work', we also aim to drive forward our own transformation into a flexible network organization that gives our employees room to maneuver and brings us even closer to our customers. After all, ambitious consultants and customer proximity are two decisive success factors in the consulting business".
